Product List  
Inkjet and Toner Cartridges

Jet Tec Inks

Dealers stamp

We manufacture both compatible and remanufactured inkjet cartridges for an extensive range of printer models. Our ink is specifically developed and designed to match and often exceed the quality of an OEM equivalent.

Why choose Jet Tec to supply your Laser Toner Cartridges?

- Up to 80% saving over the OEM
- More environmentally friendly than compatible and OEM toner cartridges
- Highest quality toner powder used to give a high quality print
- All toner cartridges are print tested before leaving the factory

Frequently Asked Questions

Why should I buy Jet Tec cartridges over original manufacturer inks?

There are a number of reasons, the main ones being Quality, Reliability, *extralife* and Price!

I've heard that compatible or remanufactured cartridges may block my printer?

This may be the case with some of our competitors. This is mainly down to the fact that air gets inside the ink cartridge at the manufacturing stage. At Jet Tec we mastered this art many years ago and have an extremely low returns rate.

Will the colours be as bright as the original manufacturer inks?

The simple answer is YES! We have 25 years experience and have perfected our inks to give rich, vibrant long lasting

prints. (However, the setting you use for your printer and the correct paper will make a huge difference to your print.)

What is *extralife*?

Our *extralife* technology has been developed to offer up to 100% more printed pages than the OEM equivalent, offering excellent value for money.

Where are your inks and toners made?

All of our inks and toners are made and manufactured in our UK factory in Lincolnshire. Employing over 300 people in the UK, resulting in wages going back in to the UK economy.

What is the page yield on Jet Tec toners compared to OEM equivalents?

Jet Tec toners have exactly the same page yield as OEM equivalents, meaning

that they will print exactly the same amount of pages.

Will buying a remanufactured toner affect the print quality?

No! Our remanufactured toners offer the same, and often higher, print quality as an OEM. Only the highest quality toners are remanufactured and each toner is print tested, ensuring a perfect performance throughout its life.

Will the colour be as vibrant as the OEM equivalents?

Yes! We evaluate and incorporate only the highest quality toner powder in our toners, resulting in unbeatable print quality.

What are you doing to help the environment?

At Jet Tec, we collect over 500,000 empty ink cartridges, laser toners and mobile phones each month. All our

packaging is environmentally friendly using recycled plastic and recyclable card. This results in much less waste going to landfill.

We have invested \$1 million in re-roofing over 10,000m<sup>2</sup> of our factory. The new roof allows more natural light into the factory, as well as reducing heat loss, which ultimately cuts the amount of energy we use dramatically.

Do you guarantee your products?

All of our inks and toners are 100% guaranteed. 2 years for inks and 3 years for toners from date of manufacture.

What if I have a problem?

The first place to visit is our support website, [www.inksupport.info](http://www.inksupport.info) If you cannot find the solution for you, feel free to contact us.
